

Let's Nurture the Security Experts of Tomorrow

Whether you're a CISO, IT Head, or Risk Officer—your commitment can secure your organization's future. From governance to incident response-Cybersecurity is the foundation of a resilient enterprise

Why

CYBERSECURITY
TRAINING Matters

The financial sector today is at the frontline of cyber risks. Phishing, ransomware, regulatory audits, and data breaches are not possibilities—they are realities. One misstep can lead to financial loss and reputational damage.

Our Cyber Security & Privacy Training
Portfolio helps organizations build resilience,
compliance, and trust. Designed to align with
International standards such as ISO 27001,
ISO 22301, GDPR, and DPDPA, the curriculum
addresses the evolving needs of global
enterprises, with a sharp focus on financial
institutions.

Our TRAINING Portfolio

We deliver a comprehensive curriculum across four key domains:

Our training is a balanced mix of concepts, case studies, and simulations, ensuring participants not only understand frameworks but also apply them to real-world business scenarios.

ISMS &

CYBERSECURITY Modules

At the core of IPEC is a multidisciplinary team of experts who bring decades of practical experience across sectors and geographies. Our expertise allows us to address industry-specific challenges while applying global best practices.

ISMS Ignition (ISO 27001 Foundations) – Introduces ISMS principles, scope, and roles.

Cyber Drill (Incident Response Simulation) –

Practical exercises on response protocols.

Cyber Sentinel (Safe Online Practices) – Teaches phishing, malware, and safe browsing habits.

Audit Armor (Audit Preparation) -

Guides teams on audit readiness and evidence handling.

Shield & Comply (Policy Awareness) – Brings ISMS policies into day-to-day relevance.

Value for Financial Institutions:

Ensures every employee—from teller to top management—understands their role in protecting sensitive information.

Business Continuity & Risk

Management

- Continuity Compass (BCP Basics) – Sustaining operations during disruptions.
- Risk Radar (Identification & Mitigation) – Spotting and controlling risks before they escalate.
- ISO 22301 BCMS Implementation

 Structured approach to Business
 Continuity Management.
- Resilience Reset (Crisis
 Communication) Managing internal and external communications during crises.
- Governance Grid (Roles & Accountability) – Establishing RACI charts and escalation paths.

Outcome:

Organizations develop resilient processes that protect customer trust, even in the face of crises.

Data Privacy & COMPLIANCE

Data Privacy Principles

Global privacy fundamentals for all employees.

GDPR Awareness

Focused training for EU & UK requirements.

DPDPA Implementation

Understanding India's Digital Personal Data Protection Act.

Training Format:

- In-person or online (via secure LMS)
- Progress tracking and completion certificates
- HR-ready documentation

Training Format:

Equips organizations to meet international regulatory expectations in banking, insurance, and fintech ecosystems.

Implementation Strategy & Impact

Structured Roll-out:

Foundation BuildingAwareness for all staff.

Role-Specific Training

IT, management, compliance, operations.

Advanced Integration Scenario-based learning.

Continuous Reinforcement

Quarterly refreshers & simulated attacks.

Impact Metrics:

- 95% staff completion in the first quarter
- 50% reduction in security incidents after full roll-out
- · 2X audit readiness compared to baseline

Let's Nurture the Security Experts of Tomorrow

Whether you're shaping strategy, managing risk, or defending networks-your expertise is a critical asset.
